May submission ngaián!?

(Problem Statement)

Have you ever gotten shocked when you hear your classmates talking about an English presentation, a Chemistry probset, whether in the classroom or in the class groupchat?

I'm sure you have, in fact, many students also have. Late requirements, if not missing submissions, because of the overwhelming flood of things to do, with the addition of deadlines that make you wonder: "**Ma cr-cram paba ini?**"

Introducing...

iSKALARSync

The program that not only keeps list of your requirements and their deadlines, but also encourages you with each finished task!

Objectives

ENCOURAGE

Makes sure the students feels proud that they finished their work on time with little badges, and words of appreciation. This helps the student feel motivated to keep continuing the no cramming mindset.

MINDSET

Hopefully, by using the program, the student implements a mindset to get the job done immediately and always avoid cramming when possible, unless you really have to.

ON TIME

The program keeps track of deadlines and also the difficulty of the task. Whatever task has the nearest deadline and the highest difficulty will automatically be prioritized to avoid cramming.

Features

REWARD

The program gives a badge, or words of appreciation after every finished task, giving the student a sense of accomplishment for saying no to cramming,

TRACKING

The program asks for deadlines, and tracks which deadline is the nearest, automatically prioritizing that certain task so the student doesn't have to risk a crammed submission.

LISTING

Lists and organizes the requirements neatly under main and sub menus like the subjects, and what kind of requirement it is.

PRIORITIZE

The program not only prioritizes through deadlines that are closer, but also prioritizes tasks that the student rates a 1-10 scale of difficulty.

Example Output

What do you want to do?

- 1-Earth Science
- 2-Algebra
- 3-Geometry
- 4-Biology
- 5-VALED
- 6-PHEM
- 7-English
- 8-Filipino
- 9-ADTECH
- 10-Social Science
- 11-Physics
- 12-Chemistry

Enter subject number: 3

How difficult is it? (1 to 10): 6

When is the due? (YYYY-MM-DD): 2025-05-12

Task added!

Logic Plan
