Goal	Data Collected	Progress
This week, we plan on adding new features to our code.	Through previous ComSci lessons, we've found more features that could help our code execute more flawlessly and neatly.	So far, we've worked on trying to see where to insert the new features.
Strength	Areas for development	Strategy for success
Adding newer features makes our code more responsive and more flawless for the user.	Managing our time. So far, we've only had small progress due to lack of time.	We'll make sure that we make time to finish and polish our code.
